

Portable Nano-Particle Emission Measurement System

EUROPEAN COMMISSION

**Horizon 2020 | GV-02-2016 | Technologies for low emission light duty powertrains
GA # 724145**

Deliverable No.	PEMs4Nano D5.5	
Deliverable Title	Exploitation plan (initial)	
Deliverable Date	2017-09-30	
Deliverable Type	REPORT	
Dissemination level	Confidential – member only (CO)	
Written By	Marcus Rieker (HORIBA)	2017-08-11
Checked by		
Approved by	Willem van Dorp (UNR) Amit Bhave (CMCL) Marcus Rieker (HORIBA) - Coordinator	2017-09-20 2017-09-26 2017-09-27
Status	Final version	2017-09-27

Publishable Executive Summary

In this report we make a first inventory of the results and outcomes of PEMs4Nano that can be used once the project is finished. In this sense, this document builds on the dissemination plan (D5.2). The dissemination plan describes how the projects and its results will be marketed and made known to the wider world before the end of the project. The exploitation plan focuses on how the results are planned to be used once the project is finished.

In this initial exploitation plan we describe the target groups, key enablers and our initial expectations of the technology and knowledge we aim to develop in PEMs4Nano. The expected outcomes are summarized in an xls-file, which will be monitored and updated during the project. In addition, these first ideas will be used as inputs for an exploitation seminar. Together, these documents serve as the basis for the final exploitation plan (D5.6) scheduled at the end of the PEMs4Nano project.

This project has received funding from the European Union's Horizon2020 research and innovation programme under Grant Agreement no. 724145.
